

Quotes**Mr Chandrasekar Palanisamy, Group Director, Traffic & Road Operations
Land Transport Authority**

"We are glad to be collaborating with Temasek Polytechnic on the Vehicle Undercarriage Inspection Device (VID). This innovation project enables our officers to conduct enforcement work with greater safety and ease. We are also heartened to see our youth apply their skills to contribute to Singapore's land transport ecosystem."

**Song Kwok Yuen, Director, School of Engineering,
Temasek Polytechnic**

"We are excited to partner LTA on this innovative solution for vehicle undercarriage inspections. This collaboration demonstrates the value of industry and education partnerships in addressing real-world challenges and driving innovation to create positive impact on society. The new VID device enables enforcement officers to perform checks for illegal modifications more safely and easily. The success of this project is a testament to the innovative spirit and strong expertise of our students and staff at Temasek Polytechnic."
